

Build the definition of a drug

Type of exercise:	<u>Introduction</u> Attitudes	<u>Drug Information</u> Skill Development	Related Information
Approximated time:	5 minutes		
Age range:	7-13		
Equipment:	Big cards with words which make up the definition of a drug		
Learning outcome:	For learners to know and remember the definition		
Tips/information:			

Description of exercise:

Ask the group if they know what a drug is. Thank them for their answers and say you've got the official definition all muddled up. Ask if they can help get it right. (If it's an older group you might skip that part!)

Give out the cards with words to different people and ask them to come to the front and see if they can make it into a sentence. They need to work together and move around until they find a place for their word. Offer help where necessary.

Get everyone to say the definition together once everyone is in the right place.

Definition: 'A drug is a substance, apart from food, that, when put in the body, changes the way your mind and body works.'
